

MATHS

Why is Maths Important?

Mathematics equips children with a uniquely powerful set of tools to understand and change the world. These tools include logical reasoning, problem-solving skills, and the ability to think in abstract ways. Mathematics is important in everyday life, many forms of employment, science and technology, medicine, the economy, the environment and development, and in public decision-making. Different cultures have contributed to the development and application of mathematics. Today, the subject transcends cultural boundaries and its importance is universally recognised. Mathematics is a creative discipline. It can stimulate moments of pleasure and wonder when a child solves a problem for the first time, discovers a more elegant solution to that problem, or suddenly sees hidden connections.

The mathematics teaching at Outwood Primary Academies is geared towards enabling each child to develop mastery; not only the mathematics skills and understanding required for later life, but also an enthusiasm and fascination about maths itself. We aim to increase children's confidence in maths and aim for all pupils to develop a deep conceptual and procedural understanding of mathematics to ensure sustainable learning. We believe that all pupils are capable of understanding and doing mathematics, given sufficient time.

We are continually aiming to raise the standards of achievement of all children in our Outwood Primary Academies to give them the best possible life chances.

The study of Mathematics, within our academies, encourages children to think deeply and helps them to problem solve more effectively – a great life skill that will support children with all future learning. Across the curriculum and key stages children explore number, geometry, measure, statistics, fractions and percentages. Lessons provide a wide range of opportunities which encourage children to construct their own learning and discover their own rules through offering them rich and sophisticated problems. Through applying a concrete, pictorial, abstract approach to Maths we support all children to build procedural and conceptual knowledge alongside developing procedural fluency.

Within lessons children are encouraged to work collaboratively to develop their mathematical language and reasoning skills - key skills essential to all areas of the curriculum.

How can the study of Maths support children's futures?

The mathematics teaching at Outwood Primary Academies is geared towards enabling each child to develop mastery; not only the mathematics skills and understanding required for later life, but also an enthusiasm and fascination about maths itself. These skills, fascination and enthusiasm equip children with solid foundations to enable them to go on to succeed in maths at GCSE and beyond.

Careers that the study of Mathematics supports include:

- Accountancy
- Statistician
- Meteorologist
- Maths Teacher
- Software engineer
- Quantity survivor
- Research Scientist

Maths is the truly global language. With it, we convey ideas to each other that words can't handle – and bypass our spoken Tower of Babel.

Professor Alison Wolf, Head of Mathematical Sciences Group, Institute of Education, University of London

Term	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Autumn 1	Numbers to 5 <ul style="list-style-type: none"> Counting to 5 Sorting into 2 groups Comparing groups within 5 	Numbers to 10 <ul style="list-style-type: none"> Place Value Numbers to 10 Number bonds Part whole Addition and Subtraction Word problems 	Place Value <ul style="list-style-type: none"> Numbers to 100 Addition and Subtraction <ul style="list-style-type: none"> Involving numbers to 100 Worded problems 	Place Value <ul style="list-style-type: none"> Numbers to 1000 Partition numbers Counting in 100s Finding 1, 10 and 100 more or less than a number. Counting in 50s Addition and Subtraction <ul style="list-style-type: none"> Involving numbers within 1000 Solving word problems 	Place Value <ul style="list-style-type: none"> 4 digit numbers The number line to 10,000 Counting in thousands and twenty fives Negative numbers Roman numerals Rounding <ul style="list-style-type: none"> Round numbers to the nearest 10 and 100. Use rounding to estimate. Addition and Subtraction <ul style="list-style-type: none"> Adding and subtracting two four digit numbers Solving multi-step problems. 	Place Value <ul style="list-style-type: none"> Numbers to 1,000,000 Roman numerals to 10,000 Interpret negative numbers in context Count forward and back in negative numbers Rounding <ul style="list-style-type: none"> Rounding to the nearest 10, 100 and 1000 Addition and Subtraction <ul style="list-style-type: none"> Adding and subtracting whole numbers with more than four digits Using rounding to check answers Mental addition and subtraction Using inverse operations 	Place Value <ul style="list-style-type: none"> Numbers to 10 000 000 Interpret negative numbers Round any number including decimals to 3 decimal places. Multiplying and dividing by 10, 100 and 1000 including decimal numbers up to three decimal places. Addition and Subtraction <ul style="list-style-type: none"> Add large numbers including decimals Solve multi-step problems Multiplication and Division <ul style="list-style-type: none"> Multiply and divide numbers up to 4 digits by a 2 digit number Interpret remainders. Solve multi-step problems and decide which operation to use and why. Order of operations. Identify common multiples and factors. Recognise prime numbers up to 100. Recognise and use square and cubes numbers. Mental calculations.
Autumn 2	Addition <ul style="list-style-type: none"> 1 more (within 5) Subtraction <ul style="list-style-type: none"> 1 less (within 5) 	Shape <ul style="list-style-type: none"> Identify and classify triangles, squares, Circles and rectangles Properties of 2D shapes Properties of 3D shapes Place Value <ul style="list-style-type: none"> Numbers to 20 Count within 20. Order and compare numbers to 20. Recall number bonds to 20. Partition numbers within 20. 	Money <ul style="list-style-type: none"> Counting money (coins and notes) Showing equal amounts Comparing money Calculating with money Multiplication and Division <ul style="list-style-type: none"> making equal groups adding equal groups multiplication sentences making arrays 2, 5, 10 times tables 	Addition and Subtraction <ul style="list-style-type: none"> Addition and subtraction within 1000 Solving word problems Multiplication and Division <ul style="list-style-type: none"> Multiplying and dividing by 3 Multiplying and dividing by 4 Multiplying and dividing by 8 Solving problems with multiplication and division 	Measure <ul style="list-style-type: none"> Measure and calculate perimeter in both meters and centimetres Convert between different units of measure Multiplication and Division <ul style="list-style-type: none"> Multiply by 10 and 100. Divide by multiples of 10 and 100. Multiplying by 0, 1, 6, 7, 9, 11 and 12. 	Statistics <ul style="list-style-type: none"> Interpreting tables Interpreting and drawing line graphs Multiplication and Division <ul style="list-style-type: none"> Identify and find factors and multiples Identify and find prime numbers up to 19 Finding and identifying square and cubed numbers Inverse operations Multiplying and dividing by 10, 100 and 1000 involving decimal numbers Measure <ul style="list-style-type: none"> Calculate and measure area and perimeter of squares and rectangles Calculate the perimeter of composite shapes Compare areas and perimeters Estimate area 	Fractions, Decimals and Percentages <ul style="list-style-type: none"> Simplifying fractions. Fractions on a number line. Comparing and ordering fractions with different denominator and those greater than 1. Add and subtract fractions including mixed numbers with different denominators. Multiply proper fractions and mixed numbers by whole numbers. Divide proper fractions by whole numbers. Calculating fractions of amounts. Problem solving with fractions. Decimals as fractions. Fractions as decimals Multiplying and dividing decimals. Percentages Equivalent fractions, decimals and percentages. Converting between equivalent decimals, fractions and percentages. Ratio and Proportion <ul style="list-style-type: none"> Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts. Solve problems involving similar shapes where the scale factor is known or can be found. Solve problems involving unequal sharing and grouping using knowledge of fractions and multiples. Solve problems involving unequal sharing and grouping using knowledge of fractions and multiples. Scale drawings. Scale factors. Scale shapes. Problem solving with ratio and proportion.
